REVIEW OF THE NATIONAL WIND FARM COMMISSIONER

The Climate Change Authority is an independent statutory body established to provide expert advice on climate change policy issues.

The Minister for the Environment and Energy, the Hon Josh Frydenberg MP, has asked the Climate Change Authority to conduct a special review of the role of the National Wind Farm Commissioner.

At the time the National Wind Farm Commissioner was established, the Government said it would review the role in 2018. This review responds to that undertaking. The Terms of Reference for the National Wind Farm Commissioner are attached. The Authority is asked to consider to what extent the Commissioner is fulfilling its Terms of Reference, the ongoing need for the role, its scope and possible models for funding. The Authority's Terms of Reference for this special review can be found on the Authority's website. More information on the role of the Climate Change Authority is available at www.climatechangeauthority.gov.au. Information on the National Wind Farm Commissioner is available at www.nwfc.gov.au.

Submission Instructions

Submissions are invited until 13 April 2018.

Should you require further information about making a submission, please contact the Climate Change Authority on freecall 1800 475 869 or via email at enquiries@climatechangeauthority.gov.au.

Overview

Submissions on the National Wind Farm Commissioner review are invited, ideally using this template to assist with the Authority's analysis of submissions. However, organisations and individuals wishing to make submissions should not feel constrained by the questions below and should feel free to provide any comments they wish. The Authority is also happy to accept submissions in other forms, including letters or emails.

Contact Details

Name of Organisation: Wind Prospect Pty Ltd

Name of Contact, Role: Joshua Birmingham, Development Manager

Contact Phone Number: 0408 585 535

Contact Email: <u>Joshua.birmingham@windprospect.com.au</u>

Date: 02/04/18

Confidentiality

All submissions except those made in confidence will be published on the Authority's website.

For submissions made by individuals, all personal details other than your name and the state or territory in which you reside will be removed from your submission before it is published.

Do you want this submission to be treated as confidential? Yes x No

1. Have you interacted with the National Wind Farm Commissioner on a complaint about a proposed or operating wind farm? If so, please tell us about the nature of the complaint.

In particular:

- I. Did the complaint relate to an existing or proposed wind farm, or was it a general complaint?
- II. What was your role in the process were you the complainant or was the complaint made against you or your company?
- III. If the complaint was about a specific wind farm, in what state and local government region is it located?
 - I. Interactions with the NWFC have been in relation to complaints made in relation to the proposed Willatook Wind Farm which is in the feasibility/pre-planning stage.
 - II. Wind Prospect is a renewable energy project developer.
 - III. The proposed Willatook Wind Farm is located in close proximity to the existing Macarthur Wind Farm. The proposed development is in the Federal District of Wannon, the Victorian State Electorate of South West Coast, within the Moyne Shire.

2. If you have interacted with the National Wind Farm Commissioner on a complaint about a proposed or operating wind farm, would you like to comment on how the complaint process was conducted?

In particular:

- I. Were you provided with information about the process for dealing with your complaint?
- II. Were you made aware that participation in the process to deal with your complaint by other parties (like state government agencies or wind farm operators) is voluntary?
- III. Were you asked to provide information to assist the Commissioner in dealing with your complaint? Did you do so?
- IV. Was your complaint progressed in a timely way?
- V. Did the Commissioner work with wind farm proponents or operators and other bodies (like state or local government agencies) on the complaint?
- VI. Were you satisfied with the process undertaken to resolve the complaint?
- VII. Were you satisfied with the outcome of the complaint?
 - I. Yes. The process was clearly defined.
 - II. Yes.
 - III. Yes. Information was provided and several face-to-face meetings took place.
 - IV. All dealings with the Commissioner were efficient and timeous.
 - V. The Commissioner involved additional stakeholders where appropriate.
 - VI. Yes
 - VII. Yes

3. The Terms of Reference for the National Wind Farm Commissioner say that the Commissioner will lead efforts to promote best practice, information availability and provide a central, trusted source for disseminating information. Do you have any comments on this aspect of the Commissioner's role?
In our experience the NWFC has established a position as a leading source of information for stakeholders. Levels of community trust seems high and the prevailing view of the NWFC is one of independence and expertise. This is a product of the fact that office has been politically agnostic in its approach.
4. Do you think there is an ongoing need for the Commissioner? Do you see this changing in the future? If so, how?

The Commissioner is undertaking an important role. There is need for a continuing, impartial body to act as an interface between the community, governments and the industry. Ideally the ambit of the role can increasingly focus on education of the community, policy refinement within government and encouraging industry best practice as standards improve across these areas.

5. Do you think the Commissioner's scope, which is currently focused on proposed and operational wind farms is sufficient? Or should it be expanded to other large scale renewable energy projects, such as solar and storage? A significant current strength of the Commissioner is the focused remit of the Office. This has allowed the Commissioner to build strong relationships with industry, government and community stakeholders. In our view, an expanded remit would potentially weaken the effectiveness of the Office and lead to reduced outcomes for all stakeholders. A similar but separate role could be created in relation to other renewable energy projects such as solar and storage which could work closely with the existing role. 6. The Office of the National Wind Farm Commissioner is funded from the Commonwealth budget at a cost of approximately \$676,000 per year. Do you think the Commissioner's office should continue to be funded in this way or should other funding models (like cost recovery from industry) be considered?

Equally it is also key that the office remains free from political influence. A political appointment with a strong ideological position (either pro or anti wind energy) would see the public lose confidence in the office and reduce its effectiveness.

A key component of the success of the NWFC has been its independence. In our view it is

model driven by industry would potentially compromise the public perception of the Office.

paramount that the NWFC remains visibly independent and impartial in all its dealings. A funding

7. Do you have any other comments about the role of National Wind Farm Commissioner?
It is Wind Prospect's view that the National Wind Farm Commissioner has been a positive development for the industry and the community. This has been driven strongly by the current commissioner who's impartial and reasonable approach has fostered trust between stakeholders.

Attachment: National Wind Farm Commissioner Terms of Reference

The negotiated settlement of the Renewable Energy Target in mid-2015 is expected to lead to increased construction of wind turbines in the next five years.

The Senate Select Committee on Wind Turbines, held during 2015, identified many issues of concern relating to the standards, monitoring and operation of wind farms.

The Government responded positively to the recommendations of the Committee's Interim Report, including creation of the role of a National Wind Farm Commissioner.

The Commissioner will work collaboratively with all levels of government, scientists, industry and the community to resolve complaints from communities about proposed and operational wind farms.

The Commissioner will refer complaints about wind farms to relevant state authorities and help ensure that they are properly addressed.

The Commissioner will work with stakeholders to identify needs and priorities for monitoring wind farms.

The Commissioner will lead efforts to promote best practices, information availability, and provide a central, trusted source for dissemination of information.

The Commissioner, supported by the Australian Government Department of the Environment, will report to the Minister for the Environment and provide an Annual Report to the Australian Parliament on delivering against these Terms of Reference.

The work of the Commissioner will not duplicate or override the important statutory responsibilities of other jurisdictions, such as those relating to the planning and approval of wind farms.

The Commissioner is to draw on the work of the Independent Scientific Committee on Wind Turbines.

The role of the National Wind Farm Commissioner will be established for an initial period of three years and will be reviewed by the Australian Government.
